

Wallpapering Guide

You've picked your style and pattern, now it's time to cover your walls. Before you wallpaper your doll's house, you will need some tools and materials.

Our Wallpapers come in standard Wallpaper or Peel & Stick - the choice is yours.

Here is a list of what you will need

Wallpaper/Wallpaper paste/ PVA glue/Ruler/Sponge/Paintbrush/Craft knife/Scissors

Step 1

The walls must be clean, dry and smooth. If your dolls house has existing wallpaper, you may need to remove this to ensure a smooth surface for the new wallpaper.

Step 2

Measuring and cutting the wallpaper, we recommend adding an extra 2 cm to your measurement to ensure you have enough wallpaper to cover the area.

Step 3

Start applying the wallpaper paste/glue onto the paper in a thin, even layer and allow it to fully soak for a non-wrinkle finish.

Step 4

Once the wallpaper is coated with the paste you can now apply this to your doll's house. Carefully position the wallpaper against the wall, double-checking the alignment. Once you're happy it is straight, use a brush or your finger to smooth it from the centre to the edges this smooths out any air bubbles and wrinkles.

Step 5

Use a craft knife to trim any excess wallpaper from the edges or corners if needed. Once the wallpaper is completely dry you can add furniture, decor and accessories to complete the look of your doll's house.
